## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, and 9 drawn to the protein of SEQ ID NO:2, DNA encoding said protein, recombinant vector comprising said DNA, transformant transformed with said vector, method of production of said protein and first method of use (method of determining a ligand to the protein).

Group II, claim(s) 8, drawn to antibody.

Group III, claim(s) 10, drawn to method of screening compound that alters the binding property between a ligand and the protein.

Group IV, claim(s) 11, drawn to kit for screening a compound that alters the binding property between a ligand and the protein, the constituents of the kit are not disclosed.

Group VI, claim(s) 12 and 13, drawn to compound that alters the binding property between a ligand and the protein, the compound is not disclosed.

Group VII, claim(s) 14, drawn to DNA which hybridizes to the DNA encoding the polypeptide of SEQ ID NO:1.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The unifying technical feature of invention I is the protein of SEQ ID NO:1. Protein of SEQ ID NO:1 is not required for Inventions II, IV, VI and VIII. Although Invention III is a method

Art Unit: 1646

of using the protein of SEQ ID NO:1 it uses separate method steps, active agents and has different effects. Restriction under 35 U.S.C. 121 and 372 entitles applicant to a group containing product, first method of making and first method of use, see Group I. Accordingly unity is lacking.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
